Portfolio: <https://psaraf-portfolio.web.app/>

I'm a dedicated mobile and backend developer with 3 years of hands-on experience in Flutter, Spring Boot and Node.js. I'm driven by creating innovative, high-quality solutions and consistently raising the bar on my work. I'm committed to continuous learning, staying up to date with modern practices, and delivering reliable, scalable applications across both mobile and backend environments.

EDUCATION

B-Tech In E&TC Engineering | Vishwakarma Institute of Technology Pune

CGPA: 8.46 | June 2021 - April 2024

Diploma In E&TC | Government Polytechnic, Jalgaon

Percentage: 95.12% | June 2018 - April 2021

TECHNICAL SKILLS

- **Mobile & Backend Development:** Flutter, React Native, Android, Kotlin, Swift, Java, Spring Boot, Node JS
- **Databases:** Firebase, MongoDB, MySQL, PostgreSQL, MSSQL
- **Cloud & Integration:** AWS EC2, AWS S3, CICD, API Testing, Docker, GitHub, Play Store, Xcode

EXPERIENCE

Software Programmer | Infibeam Avenues Ltd, Pune | Dec 2025 – Present | [Link](#)

- Build and maintain high-performance Flutter, React Native, and Android SDKs to enable seamless payment gateway integration for merchant applications.
 - Architect custom Flutter packages and React Native plugins to simplify complex merchant workflows.
 - Develop secure Spring Boot APIs for core payment modules, including UPI, cards, net banking, and coupon management. Collaborate with cross-functional teams to design scalable architectures and secure transaction flows.
- **Skills:** Flutter, React Native, Android, Java, Spring Boot, MSSQL, SDK Development, Plugin Development

Flutter Developer | QuickStay Pvt Ltd, Gurgaon | July 2024 – Dec 2025

Flutter Developer Intern | QuickStay Pvt Ltd, Gurgaon | Dec 2023 – July 2024

1. QuickStay Smart– Property Owner App & Web Dashboard | [Link](#)

- Built the entire application from scratch using Flutter with clean architecture.
- Created both mobile app and Flutter web dashboard for property owners.
- Added features like Aadhaar verification, payment gateway integration, Google Maps, and push notifications.
- Enabled owners to manage tenants, rent collection, utility bills, staff, complaints, and property permissions.
- Designed automated billing workflows and detailed property management tools.

2. QuickStay Tenant App – User Application | [Link](#)

- Developed a dedicated mobile app for tenants to manage all property-related tasks.
- Added features such as rent payment, add complaint, guest entry requests, add roommate, and receipt generation.
- Connected seamlessly with the OwnerSmart system for real-time updates between owners and tenants.
- Integrated online and offline payment options, including CashFree.

3. Hostel/PG Dashboard – Flutter Web ~ [Link](#)

- Built a responsive web dashboard for hostel/PG management using Flutter Web.
- Added student management features: add/update students, attendance, leave requests, and room allocation.
- Implemented face verification for secure check-in and attendance tracking.
- Developed smooth admin workflows for daily hostel operations.

➤ **Skills:** Flutter, Node JS, Firebase, MYSQL, API Integration, BLOC, Provider, CICD, GitHub

Full Stack Developer (Contract Based) | Jeeth Pvt Ltd, Hyderabad | Jan 2025 – Nov 2025

1. OnionPe – Payment Gateway

- Designed and developed a complete payment gateway system with 50+ TypeScript-based microservices.
- Integrated major payment providers including PayU, PhonePe, and Zwitch.
- Built an automated wallet and commission management system.
- Created multi-level admin dashboards using Next.js for managing transactions, settlements, and payouts.
- Implemented secure authentication using JWT, added IP whitelisting, and enabled real-time transaction updates.
- Set up scalable AWS infrastructure with MySQL to support high-performance operations.

2. Eashwara App – Pooja & Pandit Booking Service

- Developed a mobile app where customers can book pooja services and request pandits.
- Added FCM notifications, deep linking, and BLoC architecture for clean and scalable code.
- Integrated CI/CD pipelines for automated builds, deployment, and Play Store updates using Shorebird.
- Improved user experience with smooth booking flow and reliable real-time updates.

➤ **Skills:** Node JS, Next JS, AWS Amplify, AWS EC2, API Testing, JSON, Postman, Android Studio

Freelancer Flutter Developer | Data Cliff Pvt Ltd | May 2024 – Dec 2024 | [Link](#)

- Built a full clinic management app using Flutter (MVVM) and Firebase.
- Created doctor dashboard for appointments, slots, announcements, and collections.
- Developed patient portal with family profiles, booking, and payments.
- Added blog posts, transaction tracking with Excel export, and appointment rescheduling.
- Integrated Firebase Auth, Google login, OTP, push notifications, and web deployment.

➤ **Skills -:** Flutter, Firebase, **MVVM architecture**, **Flutter Web**, Rest API, firebase hosting, VS Code

PROJECTS

Fabel India - Fashion Social Commerce Platform ~ [Link](#)

About App: Developed a full-stack social commerce mobile application for Fabel India featuring real-time chat, reels, and stories. I integrated AI-driven face-scanning technology via third-party APIs to provide personalized skin analysis while engineering advanced tag-based search and discovery tools. Managed the end-to-end lifecycle from initial architecture to successful publication and maintenance on the Google Play Store.

Quotes Mitra - Creative Poster Generator App ~ [Link](#)

About: Developed a comprehensive poster creation app that enables users to generate personalized marketing materials with automated branding. I integrated the Gemini API for AI-powered custom poster generation and implemented secure OTP-based authentication. Additionally, I built and deployed responsive web pages for account management and privacy policies using Firebase Hosting to ensure a seamless end-to-end user experience.

Skills & Technologies: Flutter, Firebase, OTP Authentication, **Gemini AI API**, HTML, CSS, **Firestore**
